Exam : **646-002**

Title : Advanced Routing and Switching for Account Managers

Version : DEMO

1.Which option is not correct for the Catalyst 4500 Series? (Select one.)

A.Scalable architecture

B.Optimal network control

C.Designed for service providers

D.Integrated Layer 2 security

Correct:C

2.How would you respond to a client if the CEO of their company asks you to justify the initial cost of converting to a converged network?

A.The initial cost is high, but your network performance will also improve significantly.

B.A converged architecture simplifies a network, which dramatically lowers operating costs, which are the largest costs associated with a purchase, as well as reduces training and management costs.

C.The cost is high because of the features that are included in our equipment.

D.The network will be less complex. Your IT staff will be much more efficient and productive.

Correct:B

3.Which feature is least important for a WAN aggregation router? (Select one.)

A.Port adapters ranging from NxDS0 to OC-12

B.Three built-in Gigabit Ethernet ports on the routing engine

C.Cisco StackWise technology

D.LAN and WAN interfaces with up to 48 ports per chassis

Correct:C

4.Edge routing is supported on which routers? (Select one.)

A.Cisco 800, 1800, 2800, 3800 Series only

B.Cisco 7200, 7300, 7600 Series only

C.Cisco 7600 Series only

D.Cisco 800, 1800, 2800, 3800, 7200, 7300, 7600 Series

Correct:D

5.Which of the following is not a benefit of fixed-configuration branch routers? (Select one.)

A.Less expensive

B.Easier to install and maintain

C.Highly scalable

D.Integrated systems approach

Correct:C
