Exam : **HP0-D23**

Title : Architecting HP
CloudSystem Solutions -
Delta

Version : Demo

1.A QA department expecting to test a new application in the next quarter.

Which low-cost solution can the cloud administrator take to help reduce the performance impact on other departments?

- A. Block out dates for the QA department exclusive access to the cloud resources by moving the server resources server over to a QA only server pool.
- B. Use the IO Calendar tab to find projected low cloud utilization periods the QA department cloud schedule for their test.
- C. Review SiteScope records to find what times of the day utilizations lowest and recommended the QA department test them
- D. Plan and order additional servers and storage to add the cloud resources pools prior to the planned testing.

Answer: C

2.A QA department wants to have an account that can build templates for their own people to use, without needing to go through administrative processes to configure them. To provide this level of access, which user group does this account need to be added?

- A. HPIO_Users
- B. HPIO_Architects
- C. HPIO_Administrators
- D. HPIO_Designers

Answer: B

3.A customer needs a service that consists of a physical server with one NIC that uses multiple VLANs. Which IO Designer template feature addresses this need?

- A. VLAN multi-tenancy
- B. Load-balanced network
- C. Network template
- D. Network trunk

Answer: A

4.What does this icon represent in the IO Designer interface?

- A. A network trunk
- B. An iSCSI network
- C. A single VLAN
- D. A pair of physical networks

Answer: A

5. There are a number of preconfigured discovery jobs displayed in the Discovery pane.

What is the recommended first job to be run?

- A. Physical servers
- B. CMS and its management processors
- C. Onboard Administrator
- D. Management processors

Answer: B

6. Which tool is used to register Microsoft System Center Virtual Machine Manager?

- A. HP OO
- B. HP IO
- C. HP IC
- D. HP VMM

Answer: C

7. What are Central Management Server (CMS) best practices? (Select two)

- A. License and manage CMS as a logical server.
- B. Install the CMS on a virtual server.
- C. Configure CMS to boot from SAN with redundant boot volumes.
- D. The CMS and vCenter should share the same physical server.
- E. Do not license and manage CMS as a logical server.

Answer: C,E

8. A template is being created for a Microsoft clustering environment. When deploying the nodes for a cluster, the Cluster Wizard gives an error that it is not able to create the cluster.

What is the probable cause of this error?

- A. The OS disks are not set to bootable.
- B. Disks are not set up with redundant paths.
- C. Data disks are set up with different RAID levels.
- D. Data disks are not shared between the servers in the group.

Answer: B

9. A customer has a c7000 enclosure with 16 ProLiant BL460c G7 server blades. Ten of the server blades are VMware ESXi 5 hosts and the remaining six are Microsoft Windows Server 2008 R2 servers. The Windows servers need to be virtualized to allow all 16 servers to become ESXi 5 hosts.

Which licensing is required to perform Physical to Virtual (P2V) migrations?

- A. HP RDP for ProLiant servers
- B. HP Insight Dynamics for ProLiant
- C. HP Insight Control for BladeSystem
- D. HP iLO Advanced for BladeSystem

Answer: B

10. Which HP software product enables IT organizations to provision compute resources consistently and automatically, from pools of shared resources using a self-service portal?

- A. HP System Insight Manager
- B. HP Operation Orchestration
- C. HP Insight Control Server Deployment
- D. HP InsightOrchestration

Answer: D
