Exam : **MB7-638**

Title : **NAV 5.0 Trade & Inventory**

Version : **Demo**

1.You work in an International company and you are a developer of Microsoft Dynamics NAV 5.0. Do you know successful use of the Requisition Management granule requires setup in what areas? (choose more than one)

- A.It requires setup in the Customer Card.
- B.It requires setup in the requisition worksheet template.
- C.It requires setup in the Substitute No. field in the Nonstock Item table.
- D.It requires setup in the planning parameter fields on items and stockkeeping units.

Answer:B D

2.You work in an International company and you are a developer of Microsoft Dynamics NAV 5.0. A customer received an invoice from its vendor for an items shipment. He received a separate invoice for the packing costs of the items after posting a purchase invoice for the items. Now he wants to assign the packing costs to the original transaction, what should he do to achieve this?

- A.He can achieve this by changing the Cost Amount (Actual) on the item ledger entry for the original purchase invoice.
- B.He should post an invoice using an item charge for packing costs and assign the item charge to the original purchase receipt.
- C.He cannot achieve this.The packing costs cannot be assigned to the original purchase receipt if the original purchase receipt posts.
- D.He can achieve this by creating a purchase credit memo and applying it to the original purchase invoice and then creating a new invoice including the packing costs.

Answer:B

3.You work in an International company and you are a developer of Microsoft Dynamics NAV 5.0. A user is dealing with a sales order and selects a lot that is still in inventory, but the lot has already been chosen by another user for a different sales order. So the user must be notified that the lot is no longer available, how and when does the system notify the user?

- A.When the item tracking line is entered, a warning icon appears.
- B.When attempting to post the shipment, a warning message appears.
- C.When the item is selected, a warning icon appears on the sales line.
- D.When closing the Item Tracking Lines window, a warning message appears.

Answer:A

4.You work in an International company and you are a developer of Microsoft Dynamics NAV 5.0. A prepayment amount can be specified, while not using a prepayment percentage. In order to specify the prepayment amount, which window can be used?
