Exam : **PEGACPBA25V1**

Title : Certified Pega Business Architect

Version : DEMO

1.What is a key benefit of Tool Rules in Pega GenAI implementation?
A. They remove the need for human oversight in generative AI systems.
B. They restrict users from interacting with agents based on user roles and responsibilities.
C. They support governance by controlling agent behavior and helping to provide transparency.
D. They allow agents to operate independently of business policies.
Answer: C

2.What is the primary purpose of the Pega GenAI Connect Step in a workflow?
A. To train large language models on existing application data.
B. To create a new Case Type based on AI-generated recommendations.
C. To replace human decision-making in approval processes.
D. To automate tasks such as summarizing Case details.
Answer: D

3.What is the primary purpose of Pega GenAI Knowledge Buddy?
A. To generate code snippets for developers.
B. To help find and manage information efficiently.
C. To connect Pega applications to large language models.
D. To create automated test Cases for Pega applications.
Answer: B

4.Which two features does Pega GenAI Autopilot provide to help developers with data management? (Choose two.)
A. Deleting unused data objects in the application permanently.
B. Suggesting choices for picklist fields in the Data Model of the Case Type.
C. Migrating data models from legacy systems automatically.
D. Generating sample records for a Data Object to make testing easier.
Answer: BD

5.A business analyst needs to quickly design a facilities management application with multiple stakeholders.
How can Pega Blueprint help accelerate the development process?
A. By summarizing notes for stakeholders to remove the need for meetings.
B. By generating tailored suggestions for Case Types, Stages, and Steps.
C. By replacing the Pega Platform development environment entirely.
D. By automatically coding the entire application without human intervention.
Answer: B
